Thanks for the update Carl. It will be interesting to hear how they respond, especially knowing that the FIP is still an option.

Greg

We had a good meeting with the Uinta Basin oil and gas producers last Tuesday. UT DEQ reps were there and Ute tribal staff called in. I used some of the OAR talking points in my comments and slides (attached).

Industry will get back to us in a week or so to let us know what they are willing to commit to do now as far as controls on existing sources and they know that a U&O FIP is also an option.

Talk to you soon.

Subject: April 14th meeting follow-up

Hi all,

We appreciate your taking the time yesterday to meet with us to discuss options for
 reducing oil and gas emissions in the Uinta Basin. The conversation was very productive
 and we look forward to continuing a dialogue with you. I have attached the sign-in sheet
 and the power point presentations. I have also attached Utah Department of Air Quality's
 (UDAQ) Ozone Advance Path Forward letter and their letter summarizing the results of

UDAQ and the Ute Indian Tribe's voluntary winter ozone reduction program for the Uinta Basin.

Thank you,

Jody
